PROFESSIONAL SUMMARY

Ambitious and highly versatile Information Systems graduate with a strong foundation in full-stack web and mobile application development. Proficient in building scalable digital solutions using modern frameworks like React, Laravel, and Flutter. Combines software engineering capabilities with practical expertise in computer systems maintenance and hardware troubleshooting. Proven track record of delivering end-to-end academic and independent technical projects, eager to contribute clean code and technical support in an innovative IT environment.

TECHNICAL SKILLS

- **Programming Languages:** Dart, PHP, JavaScript, TypeScript, Python, SQL, HTML5, CSS3
- **Frameworks & Libraries:** React.js (Vite), Node.js, Express, Prisma, Laravel, Django, Flutter, React Native
- **Databases:** PostgreSQL, MongoDB, MySQL
- **Tools & DevOps:** Git, Docker, CI/CD pipelines, Jest, Postman, Insomnia
- **Methodologies & Security:** RESTful API Design, JWT Authentication, Object-Oriented Programming (OOP), Agile, Scrum
- **IT Support:** Computer Systems Maintenance, Hardware Troubleshooting, Operating System Installation

TECHNICAL PROJECTS

Compliance Risk and Safety Management System | *Full-Stack Developer*

GitHub: [://github.com/COMPLIANCE-RISK-AND-SAFETY-MANAGEMENT-](https://github.com/COMPLIANCE-RISK-AND-SAFETY-MANAGEMENT-)

- Engineered a cross-platform web and mobile application designed to track organizational safety risks and compliance protocols.
- Developed the backend architecture using scalable APIs and implemented secure user authentication utilizing JWT.
- Managed data persistence by integrating a relational database system to generate real-time compliance reporting.

QR Code Attendance System | *Lead Developer*

GitHub: [://github.com/qr_code_Attendances_System](https://github.com/qr_code_Attendances_System)

- Built a functional attendance tracking solution utilizing dynamic QR code generation and mobile scanning capabilities.
- Created a responsive frontend interface to display attendance analytics, minimizing manual logging errors.
- Formulated clean database queries to securely store and process timestamps and user registration data.

Academic Group Contribution Tracker | *Mobile & Web Developer*

GitHub: [://github.com/Academic_Group_Contribution_Tracker](https://github.com/Academic_Group_Contribution_Tracker)

- Designed and deployed an application aimed at monitoring and evaluating individual student contributions in group assignments.
- Built interactive dashboard modules to facilitate peer reviews and progress tracking metrics using modern Javascript frameworks.

DALALIAPP | *Mobile App Developer*

GitHub: [://github.com/Native_DALALIAPP](https://github.com/Native_DALALIAPP)

- Developed a native mobile real estate application mapping local property listings for simplified user browsing.

- Streamlined application performance and optimized UI rendering to ensure a smooth, high-speed mobile user experience.

Medicine Locator for Pharmacies | *Full-Stack Developer*

GitHub: [://github.com/medicine_locator_for_pharmacies](https://github.com/medicine_locator_for_pharmacies)

- Programmed a search-driven web platform to help users locate specific medical supplies across distributed pharmacy databases.
- Created localized search queries to connect user location inputs with real-time pharmaceutical inventory records.

EDUCATION

Bachelor of Information System and Management

Ardhi University – Dar es Salaam, Tanzania | *Graduation Year: 2026*
